Your solution.png cuts compared with the explicit scalar formula
$E_1 = 0.01$, $t_c = E_0 = 0.3$ meV; two cycles; same axes
$r = |t_1|_{\max}/E_1 = 0.1$
$r = |t_1|_{\max}/E_1 = 1$
$r = |t_1|_{\max}/E_1 = 2.3446$
$r = |t_1|_{\max}/E_1 = 10$
$f_r(\tau) = \sqrt{F_r(\tau)}$
τ (100/meV)
solution.png: Complete B (pixels)
solution.png: Slow rotations (pixels)
